

TXT 1994.5 and UP Dash

Place the new cover over existing dash area. You will need to use great force to push the cup holders into place. Do not hit with hammers! Hard pushing and manipulation will work the cover on!

On the key switch plate remove the center push pins on black rivets. Park in an area they can fall to so you can find them. Place key switch plate on new dash and install plastic rivets and center push pins.

Drill 1/8" holes in the area's marked and install screws.
